***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 24-59, drawn to a method for treating a subject having a B-cell malignancy comprising administering at least one human, humanized or chimeric anti-CD22 antibody and an additional agent (i.e. drug, toxin or chelator), classified in class 424, subclass 133.1.
  - II. Claims 60-97, drawn to drawn to a method for treating a subject having a B-cell malignancy comprising administering at least one anti-CD22 antibody and a therapeutic agent (i.e. drug, toxin or chelator), wherein the said agent is attached indirectly or directly to said antibody via a free sulfhydryl group, classified in class 514, subclass 8.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions utilize different reagents. The first claimed invention uses hybrid or recombinantly made antibodies, which contain the binding specificity of a murine antibody. The second claimed invention implements the use of a naked antibody possibly coupled to a therapeutic agent via a sulfhydryl group. The two different reagents have different structure.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alana M. Harris, Ph.D. whose telephone number is (571) 272-0831. The examiner works a flexible schedule, however she can normally be reached between the hours of 6:30 am to 5:30 pm.
